MyPlaceIQ

Super Smart Air-conditioning

ENERGY BILL

Shred your energy bills closer to ŻERO

We're on a mission to help Australians live more comfortably, with greater freedom from rising energy costs.

MyPlaceIQ's intelligent home energy ecosystem connects and manages the way energy is generated, stored and used throughout your home. The result is a more comfortable, efficient and affordable way to live - bringing you a future with energy bills closer to zero.

The only air-con technology that integrates with solar

Save up to
$617 a year
on energy bills*

1

Estimates

Estimates today's solar production.

2

Decides

Once your preset temperature is reached, IQe intelligently runs your air-conditioning while keeping energy consumption below your solar production, ensuring you come home to comfort.

3

Saves

You save up to $617 on your energy bill* while experiencing your preferred home comfort.

And can harness the 3 hours of free power

IQe is always thinking about the best energy timing, so you don't have to. It even knows when to take advantage of the 3 hours of free power through the Solar Sharer Offer. During this period, it will prioritise use of grid energy, running the air-con to get your home to your preferred temperature for home arrival, while reducing the need to run your air-con during higher-cost peak periods.

Stay comfortable and in control

The most beautiful interface

IQ Air's modern, intuitive interface enhances both home comfort and aesthetics.

Control your home, your way

Select the control option that best suits your home and lifestyle:

Smartphone control

Control IQ Air from your compatible smartphone.

Smartphone + 8" touchscreen

App control with a compact wall-mounted touchscreen.

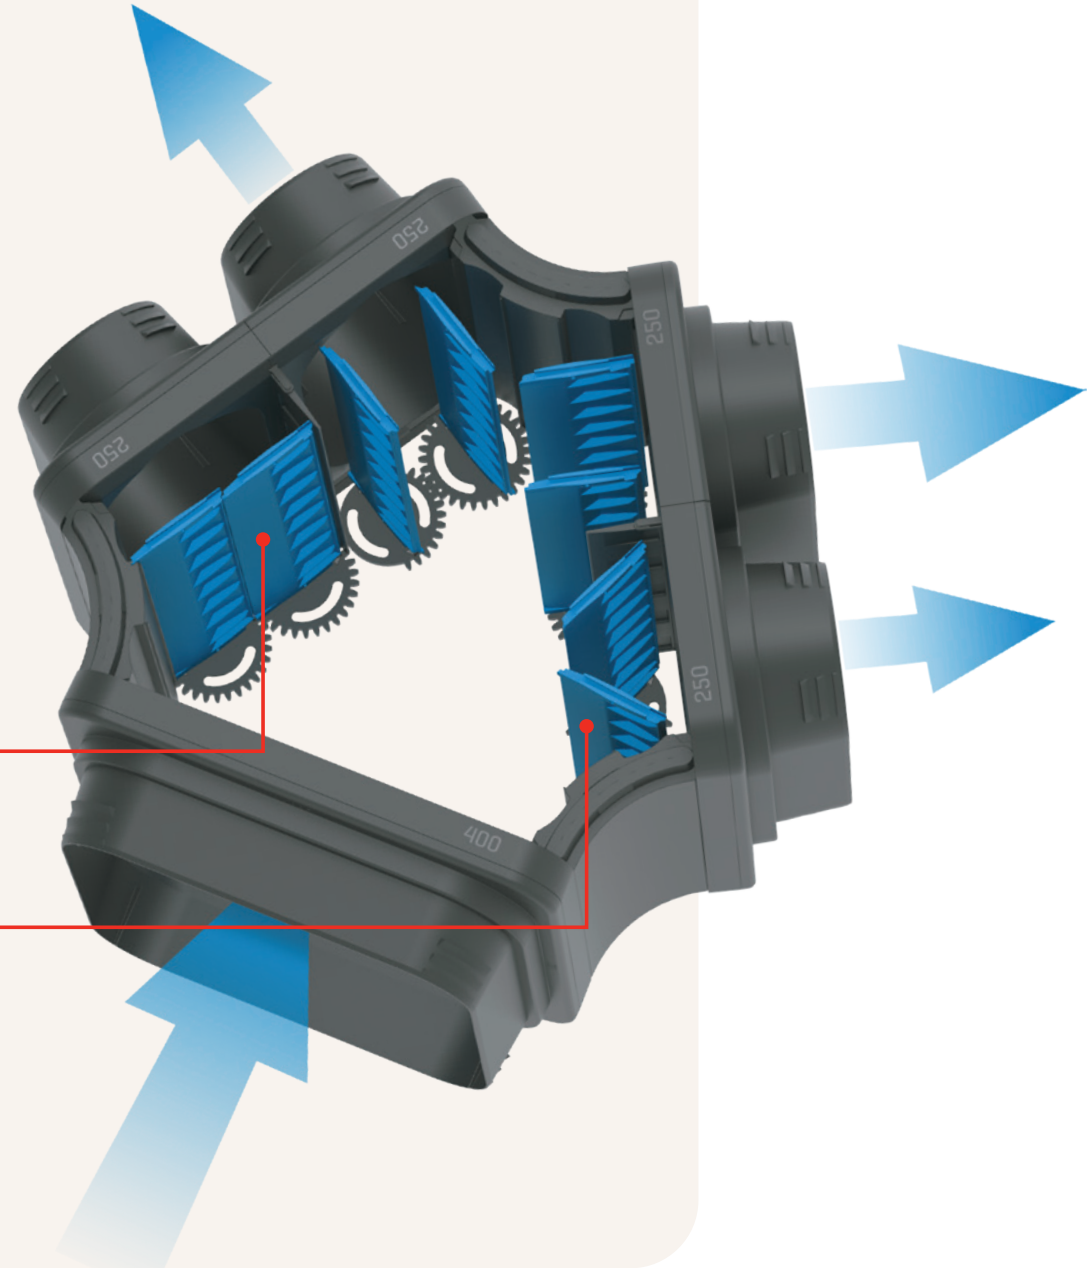
Smartphone + 11" touchscreen

App control with a larger premium touchscreen display.

More zones. More control. More savings

Engineered for performance
Designed for efficiency

The unique, R1.0-rated HEX air regulator more accurately distributes airflow across up to 10 zones using Opposed Blade Dampers. By adjusting in 5% increments, it helps reduce energy waste while supporting steadier temperatures and greater comfort throughout your home.



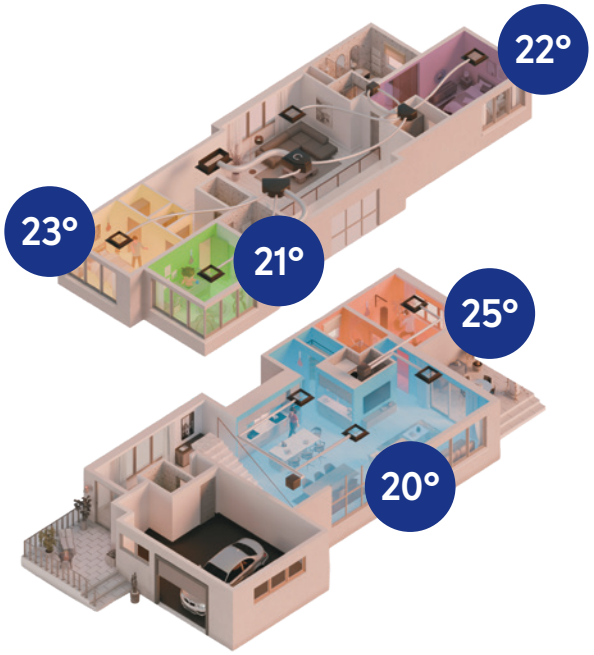
Opposed Blade Dampers

Open/close in 5% increments to give you a more precise amount of air into each room

Why more zones matter

Most ducted air-con systems installed across Australia are traditionally 2 or 4-zone systems. This means multiple rooms are often grouped together into one zone. So, when the air-con goes on, you're using much more energy than necessary to cool the one room you're in. But not with IQ Air.

IQ Air allows for up to 10 zones, with optional temperature sensors in each zone, so you only send airflow to the rooms that you're actually using, making your air-con up to 46%* more energy efficient. The increased number of zones also allows everyone in the family to have their room at their preferred comfort level.



up to 46% more efficient*

Your whole home, working together

The complete IQ ecosystem

IQ Air is one part of a connected ecosystem designed to manage comfort and energy more intelligently:

- **IQ Air**
  Efficient air-con control
- **IQ Solar Battery**
  Energy storage and management
- **IQ Smart Hot Water**
  Smarter hot-water energy use
- **IQ Pool Pump**
  Smarter pool pump energy use
- **IQ EV Charger**
  Intelligent vehicle charging
- **IQ Home Smarts**
  Connected blinds, lighting and garage control

While each system works on its own, together they form a connected home energy ecosystem where IQ does the thinking for you. By uniting your solar generation, battery storage, and energy consuming appliances, the ecosystem automatically optimises your home's energy usage to help bring energy bills closer to zero.

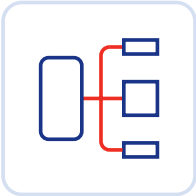
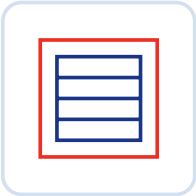
Wide System Compatibility

IQ Air offers one smart platform that can work across both ducted air-con systems as well as selected split and VRF (Variable Refrigerant Flow) / VRV (Variable Refrigerant Volume) systems. So, you can experience greater flexibility when choosing or upgrading your air-con.

Compatible with:



VRF



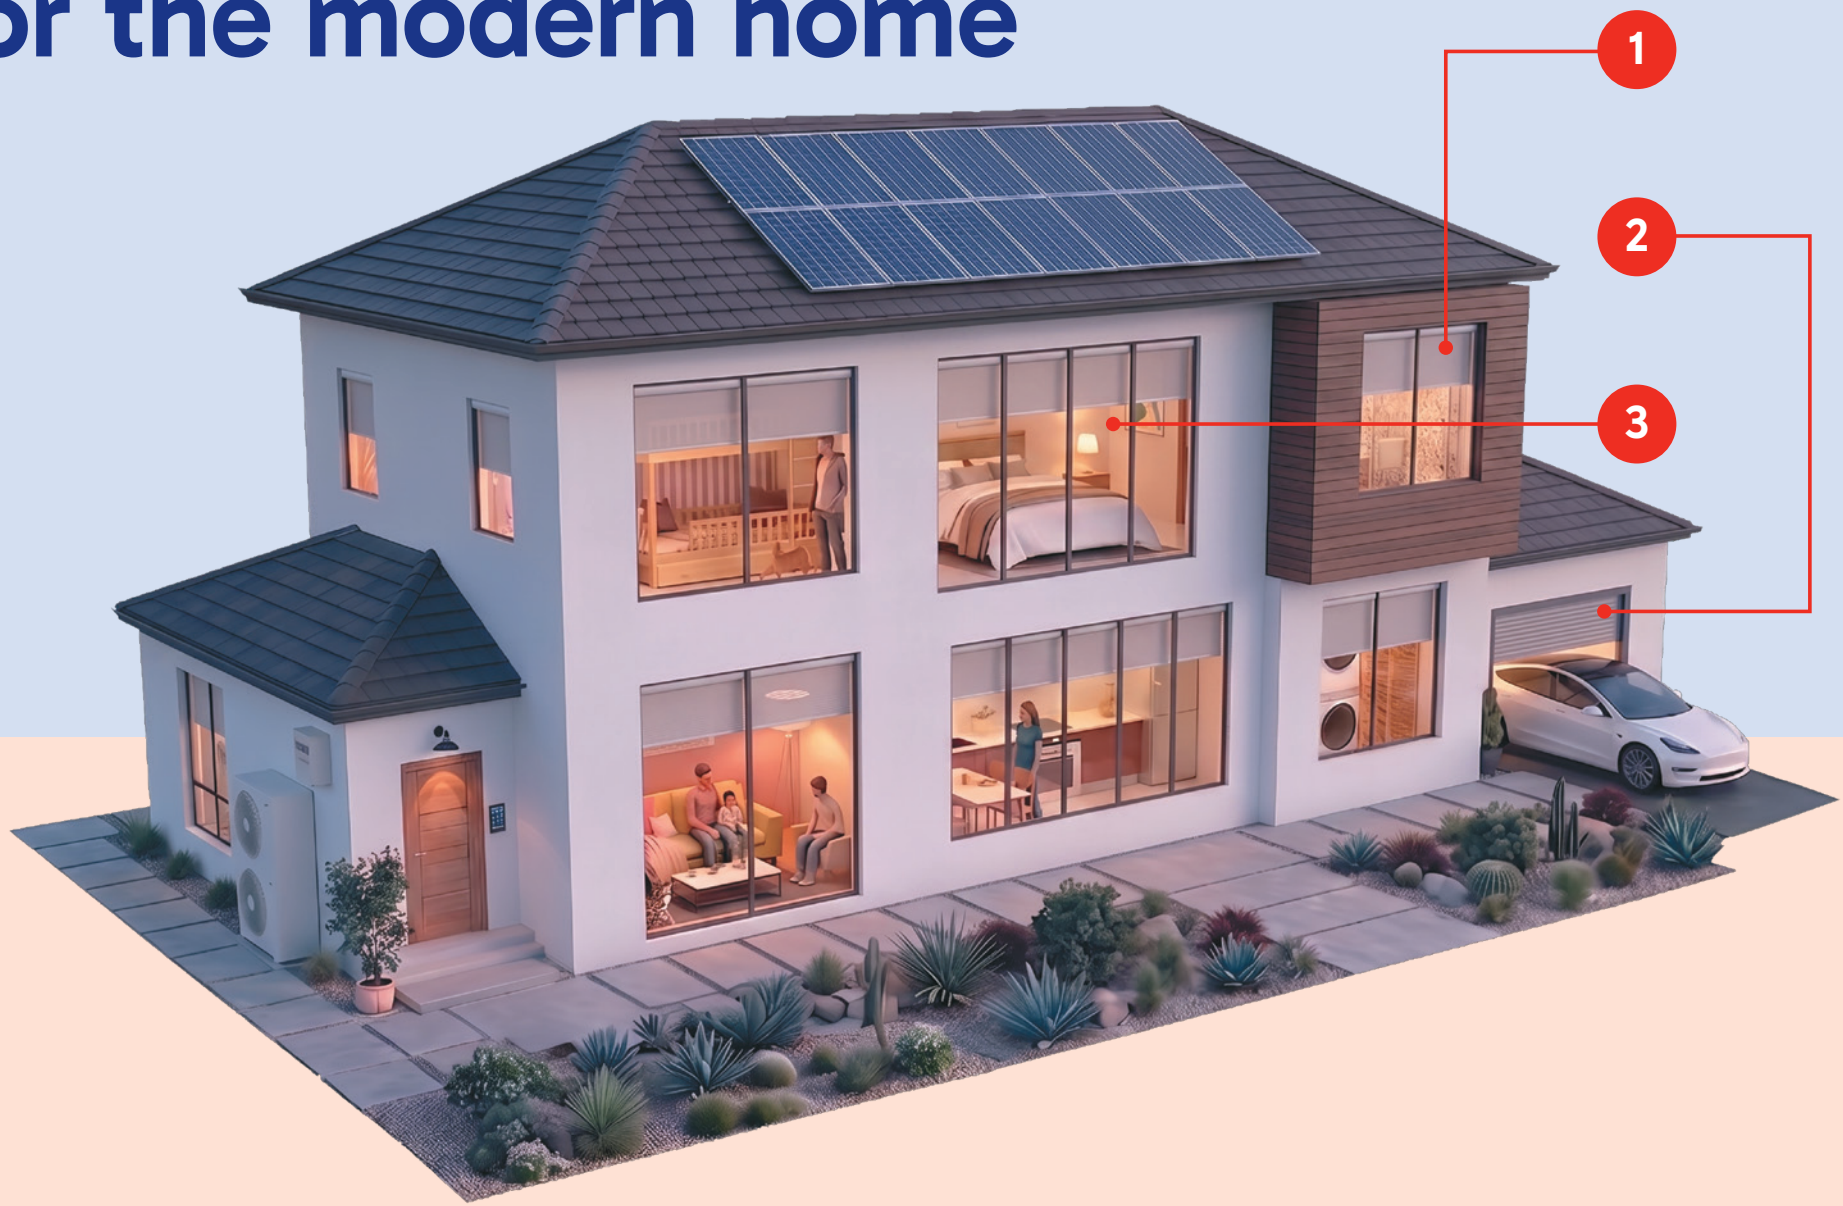
Ducted

Split

Future-ready technology

As your home changes and modernises, IQe is designed with flexibility in mind, supporting a wide range of evolving air-conditioning systems and solar infrastructure, helping you get your energy bills closer to zero both now and in the future.

A future-ready system for the modern home



Maximise home comfort and shred your energy bills closer to ŻERO

Our smart modules are designed to integrate with your IQ Air, for added energy saving, convenience and peace of mind.

Smart Blinds

Our smart blinds can be scheduled to close in the afternoon, blocking the sun to keep home temperatures stable. This significantly reduces air-con load, saving you big on energy bills.

Smart Garage Control

Left the garage open? MyPlaceIQ has your back. Our Smart Garage Control notifies you when it's left open so you can close it remotely from your phone. It can also be used to accept a delivery when you're not home, so you know it's safe and secure.

Smart Lighting

Our IQ smarts can also help you control your lights directly from your phone. So you can make sure they're turned off when you're out to reduce energy use, and switch them on before you get home for a comfortable arrival.

We’ve got your back

Our Australia-based customer support team is here to help you get your power bills closer to ZERO

35 years of home comfort expertise

We've been engineering and delivering air-con and smart home solutions in Australia for over three decades.

Premium technology, locally supported

Our Australian-designed and manufactured technology is backed by our ongoing local Australian support team.

Top-rated by customers

Consistently rated 4.7 stars by homeowners who value comfort, energy efficiency and performance.

White glove handover

Once your IQ Air system is installed, our locally based teams can provide a personalised handover, guiding you through its key features and showing you how to get the most from your system.

Proud Principal Partner of the Penrith Panthers.
